

LED Lamp

LED bulbs can last up to 50,000 hours, that's nearly 23 years at 6 hours a day usage. They use much less power than fluorescent lamps, CFLs, and a fraction of the power that incandescent lamps use. They don't use a ballast and therefore don't produce heat. They save on maintenance costs (infrequent replacement, and no ballast replacement) and are good for the environment (no mercury content). LED Lamps can be used to replace most incandescent and CFL lamps.

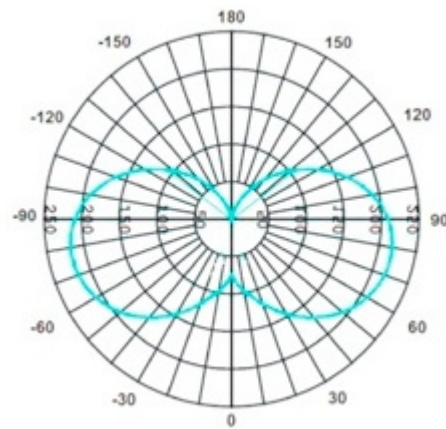

LED lamp

Item Code: BLB-29613

120V AC, 25W, 2200 lumens, 6000K

E26 Medium Base

| |
|-----------------------------|
| Lumens: 2200 |
| Watts: 25 |
| Light Color (Kelvin): 6000K |
| Voltage: 120V AC |
| Base Type: E26 medium |
| Size in Inches: 2.75 x 6.1 |
| Size in mm: 70 x 156 |
| CRI (Ra): 80 |
| LED Type: Lextar |
| Beam Angle: 360° |
| IP rating: 20 |
| Power Factor (PF): >0.8 |

| |
|---|
| Fixture Color: White |
| Fixture Material: PC |
| Lifetime (Hours): 50,000 |
| Carton Quantity: 20 (5/inner carton, 20/outer carton) |
| Carton Size: 8" x 15.5" x 13.5" (203 x 394 x 343mm) |
| Carton Weight: 14.55 lbs (6.6 kg) |
| Warranty (Years): 3 |
| Luminous efficacy: 88 lm/W |
| Working Temperature: -4°F to +104°F (-20°C to +40°C) |
| Certification: CE, RoHS |
| Net Weight: 0.52lbs (235 g) |
| Notes: Compares to 80W MH/HPS/HID, 50W CFL, 200W Incandescent |
